Chart: Track Junction

## ※Hardware Installation Main Installation Dimension

**Step 1:** Connect your tracks first with junction plate.

- Step 2:** ① Measure the overall height for the center line of the track, make sure it should be door height + [1-11/16 (43mm)] above the floor.
- ② Mark out all the holes' position according to your track.

### Step 3: Drill holes and install your track

- ① Concrete wall: Drill out the holes by using a drill with 3/8" (10mm) drill bit.
- ② Wooden wall: Drill out the holes by using a drill with 1/4" (6mm) drill bit.
- ③ Install the track refer to the below image.

- Step 4:** ① If you use type A floor guide  , you will need to open a slot [5/16" (7mm) wide, 3/4" (20mm) deep] at the bottom of the door with a slotting machine.
- ② If you use type B floor guide  , please skip this step.

**Step 5:** Install hangers on your door.

**Step 6:** Install anti-jump pad. As the picture shows, the screw is near the edge of your door.

**Step 7:** Put your hangers on the track, then twist the anti-jump pad facing to your wall.

**Step 8:** Install your floor guides.

Type A

# Type B

**Step 9:** Adjust and fix stoppers to make the door not detach from the floor guide whether the door on close or open position.
